L.O: To understand the importance of hygiene for humans.

Comparative and Fair Testing

In this lesson, we will be investigating the best way to wash our hands to keep them clean and hygienic.

We learnt about how we can keep clean.

We then cleaned our hands using paper towels, cold water, warm water and warm water with soap.

We washed our hands for 10 seconds each and scrubbed them 5 times to keep the test fair.

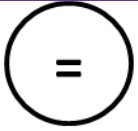

Wiped with a paper towel.	Washed with cold water only.
Washed with warm water only.	Washed with warm water and soap.

Challenge: What is the best way to clean our hands?

Well done. We have investigated the importance of hygiene for humans and we found out the best method for keeping our hands well sanitized.
