He is very, very like me from the heels up to the head; And I see him jump before me, when I jump into my bed. The funniest thing about him is the way he likes to grow- Not at all like proper children, which is always very slow; For he sometimes shoots up taller like an india-rubber ball, And he sometimes gets so little that there's none of him at all. He hasn't got a notion of how children ought to play, And can only make a fool of me in every sort of way, He stays so close beside me, he's a coward you can see; I'd think shame to stick to nurse as that shadow sticks to me! One person talks through the telephone only.

- What does the other person hear?
- Is the sound clear/ not clear?
- How do you think the sound travelled from one cup to the other? Think about the air particles vibrating.

Stand quite close to each other and carry out the investigation again.

What happens this time? Is the sound clear/ not clear? Why do you think this is?

Experiment with different distances and notice what happens to the sound each time.
