

## Years 5&6

### Harry Potter

Bowtruckles,  
Flying keys, Old  
letters and  
Hedwig Owl

Bowtruckles were created from wire, tape, florists tape, fake leaves and glue

The armature was built from bending, twisting and wrapping the wire. This was then covered and a final layer of glue applied to hold everything in place

Flying keys - wings were drawn onto tracing paper, cut out and then laminated

Old letters were constructed from card and then drawn on using old lettering. They were then painted with tea bags, coffee and watercolours to age them.

Hedwig Owl was made using thick white paper which was designed with watercolour pencils and ink pens. Other feathers were created from milk bottles and polypropylene which was cut and bent into shape. The claws were made using wire that was bent and wrapped to add texture. All the feathers were stapled onto an MDF owl shape.
