construction and weaving
Identifying species
Balancing materials

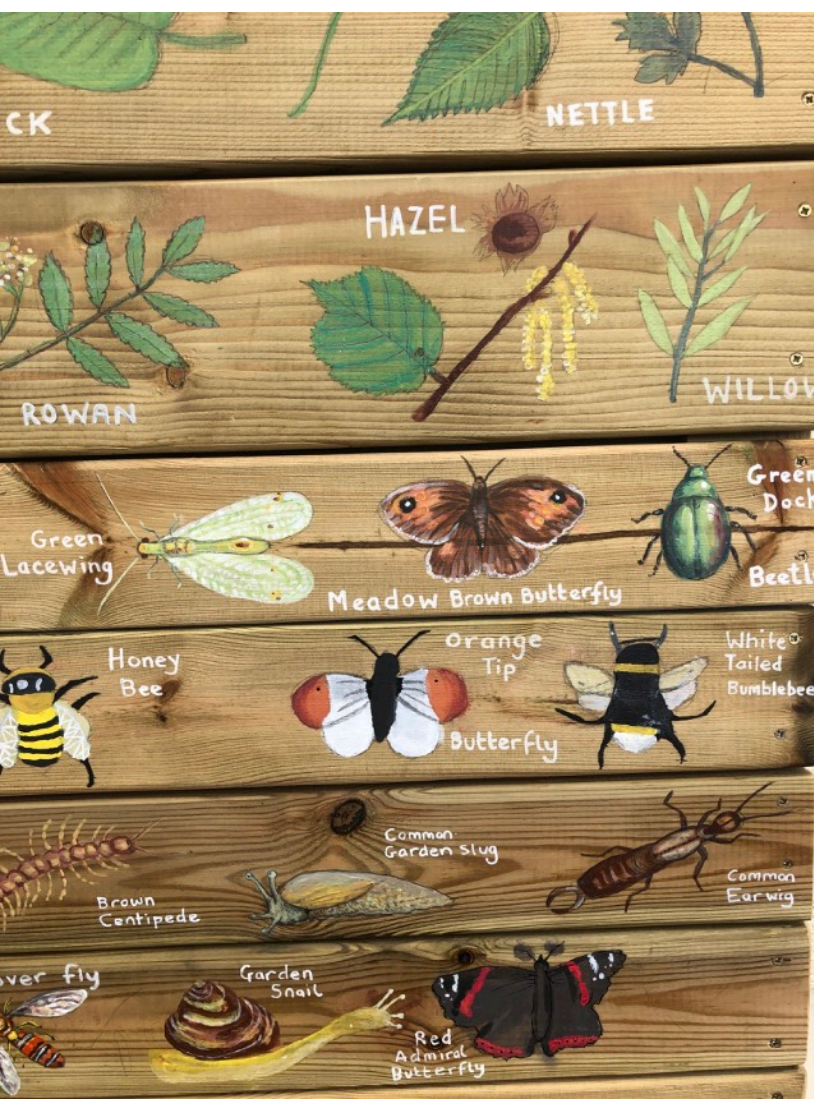

Forest school

Creating identification boards for flora and fauna that can be found there...

Bugs Birds and Plants

It's taken weeks of close observation and careful painting with Year 5. The identification board is now in place so that all children can learn about the different species of flora & fauna.

It is part of the ongoing re-development of the covered area that will a place to

- dress ready for forest school
- discover more about the creatures that live there
- play with loose parts
- relax and get creative at an art and making station...

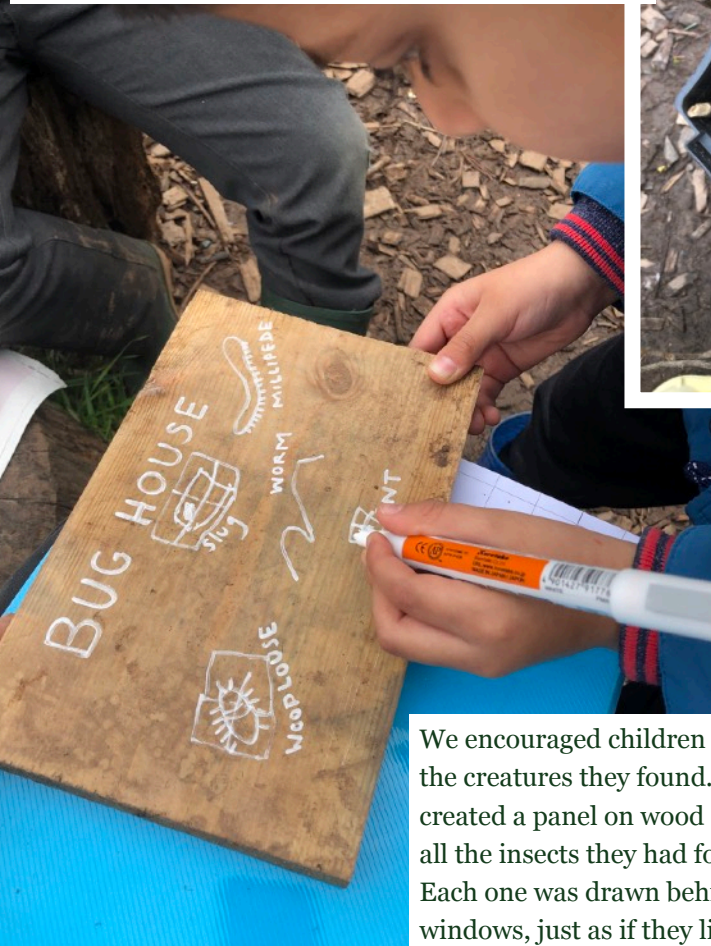

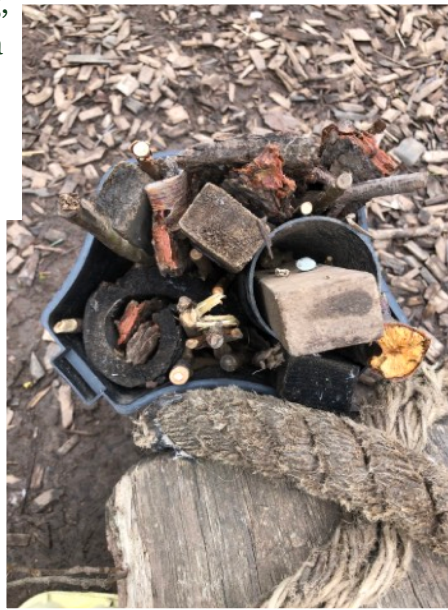

Forest school

A home for bugs

Fascinated by the mini beasts they were finding, the pupils were encourage to think of building a habitat that they might like live in... "Got to be dark" "They need sticks, I think sticks would be good". "Maybe some water too"

We encouraged children to draw the creatures they found. They created a panel on wood showing all the insects they had found. Each one was drawn behind windows, just as if they lived in a house !
